America's Dumbest Dates-Merry Bloch Jones 1998 Relates the stories of less-than-perfect dates experienced by nearly 400 people of varying ages, races, religions, and professions

America's Dumbest Doctors-K. Patrick McDonald 2009-09 National Healthcare Reform? Now that's a complex subject. But here's an idea: Why don't we just start by weeding out the lunatics? The Florida doctor who conspired with his brothers to chop off a finger with an axe, so they could collect a nifty insurance pay-off . . . The New York physician who accidently blew himself up, demolishing an entire building, to spite his divorcing wife . . . The Arizona MD who - while facing 67-counts of sexually abusing his patients - announced in court, "Okay. So I'm not exactly Dr. Marcus Welby." The East Coast doctor who stole a cadaver's hand in order to impress a topless dancer . . . Oh, we're just getting started. There are 100,000 more you might want to keep an eye on.

"Author McDonald breaks ranks and names names. I sincerely wish I could report that these are merely a few far-out nutcases. I honestly cannot say that. And this fact alone makes his work, regrettably, important." J. William Hollingsworth, MD (Retired) Former Chief of Medicine, San Diego VA Medical Center

"Disturbing, provocative and uncomfortably funny." Lesley Miller, MD, (former "surgeon to the stars") USC Medical Center, L.A.

Patrick McDonald is a graduate of UCSD School of Medicine, La Jolla, original EMS program. He was appointed the first EMS supervisor for the city of San Diego.
under Mayor (and then governor) Pete Wilson's administration; was a coauthor of the National Waterpark Lifeguard Training Manual; a set medic on such movies as Planet of the Apes; has provided medical services for entertainers such as Engelbert Humperdinck and the Commodores. For three decades this author and guest speaker has collected thousands of outlandish physician stories. He writes, "I waited 25 years for someone else to do this. The fact is, no profession in America spawns more outright lunacy. And we thought you might like to know a little more about it."

Presidents' Body Counts: The Twelve Worst and Four Best American Presidents Based on How Many Lived or Died Because of Their Actions-Al Carroll 2014-03-26 Endorsed by the Thom Hartmann Show! Over 1000 downloads! Most rankings of presidents are popularity contests based on most recognized or best liked based on the political bias of the judges. This book abandons all partisan nonsense for the only ranking that matters a humanitarian one: Who were our best and worst presidents, based on how many lived or died because of their actions? Twelves presidents were our worst, guilty of crimes as serious as genocide or wars of aggression. Many ignored genocide or terrorism, or were so incompetent or blinded by politics, that sometimes millions died. Four presidents, each strongly despised by many, were actually our best presidents, saving millions of
lives, defending human rights, and preventing wars. For more info on author see http://alcarroll.com

Stinkers! America's Worst Self-Published Books-Michael N. Marcus 2012-07-10 Although it has become relatively easy to self-publish, it's also easy to make serious mistakes in writing, design and marketing that can seriously limit the acceptability and sales of a self-published book. It's sad--and funny--that some of the worst self-published books, and the majority of the books discussed in this book, are books that try to provide advice to other authors. This book will help you avoid the worst mistakes of others, so you can publish a book that you can be justifiably proud of, and perhaps enlighten, entertain and inform others--and maybe you'll even make some money.

The Best and Worst Country in the World-Stephen Adams 2001 From its earliest days, the Virginia landscape has elicited dramatically contradictory descriptions. The sixteenth-century poet Michael Drayton exalted the land as "earth's onely paradise," while John Smith, in his reports to England, summarized the area around Jamestown as "a miserie, a ruine, a death, a hell." Drawing upon both familiar history and lesser-known material from deep geological time through the end of the seventeenth century, Stephen Adams focuses on both the physical changes to the land over time and the changes in the way people viewed Virginia. The Best and Worst Country in the World reaches well beyond previous accounts of early American views of the land with the inclusion of fascinating and important pre-1700 sources, Native American perceptions, and prehuman geography and geology. A blend of history, literature, geology, geography, and natural history, enriched by illustrations ranging from a dinosaur footprint to John Smith's famous "Map of Virginia," Adams's work offers an ecocritical exploration of the varied preconceptions that have shaped and colored the human relationship with "the best and worst country in the world"--the early Virginia landscape.

Best-Worst Scaling-Jordan J. Louviere 2015-09-23 Best-worst scaling (BWS) is an extension of the method of paired comparison to multiple choices that asks participants to choose both the most and the least attractive options or features from a set of choices. It is an increasingly popular way for academics and practitioners in social science, business, and other disciplines to study and model choice. This book provides an authoritative and systematic treatment of best-worst scaling, introducing readers to the theory and methods for three broad classes of applications. It uses a variety of case studies to illustrate simple but reliable ways to design, implement, apply, and analyze choice data in specific contexts, and showcases the wide range of potential applications across many different disciplines. Best-worst scaling avoids many rating scale problems and will appeal to those wanting to measure subjective quantities with known measurement properties that can be easily interpreted and applied.

Nature is the Worst-E. Reid Ross 2017-01-02 500 of the most absurd and horrifying things that happen in nature! Crashing waves, stunning sunsets, sprawling landscapes. Nature is beautiful,
right? Wrong. Nature Is the Worst. Need proof? The giant pitcher plant not only eats bugs, it's large enough to trap small mammals. Almost 90 percent of the koala population in Australia has chlamydia. A hailstorm in Bangladesh in 1986 killed 92 people with giant balls of ice weighing more than 2 pounds apiece. Crocodiles can climb trees. The poisonous Dracunculus vulgaris, or voodoo lily, smells like rotting flesh, looks like it's splattered in blood, and features a central black spike that can grow up to 4 feet tall. Cats often kill their first litter. A "haboob" is a biblically-huge wall of dust that can reduce visibility to zero, reach a height of 5,000 feet and stretch as far as 100 miles wide. Vampire bats are totally real, and yes, they love blood. Nature Is the Worst contains hundreds of cringe-worthy, shocking facts you never knew about nature that prove the world is a terrifying--and sometimes very strange--place.
