In addition, there has been a move towards improving links with mainstream economic, financial and social history through techniques and outlook. The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field. The Bibliography is a unique volume which covers the depth and breadth of research in business history. This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians.

A History of GKN-Edgar Jones 1990-11-19 This history of GKN (formerly Guest, Keen & Nettlefolds) shows the dramatic changes which occurred to the group in the 25 years following the end of the first world war. It describes the merger with the steelmakers, John Lysaght, the development by acquisition of its fastener interests and the extension of the business into Australia and India. With the rise of H.Seymour Berry, Lord Buckland and Sir David Llewellyn to the highest ranks of its management, a new strategy for growth was implemented: the takeover of major collieries in South Wales and associated sales and marketing companies. Undertaken in the harsh competitive twenties, the plan foundered on the slump. The thirties saw GKN divest itself of its coal and heavy steel interests to bring the focus back to light engineering in the Midlands. A return to sound profits was interrupted by the Second World War which caused disruption as the group was called upon to manufacture munitions and machinery demanded by the armed forces. Using internal company records, this business history reveals strategic policy decisions, demonstrates the sources of income and assesses the strengths of the management and contribution of the workforce.

The Oxford Handbook of Entrepreneurship-Mark Casson 2008 Entrepreneurship has always been a key factor in economic growth, innovation, and the development of firms and businesses. More recently, new technologies, the waning of the "old economy", globalization, changing cultures and popular attitudes, and new policy stances have further highlighted the importance of entrepreneurship and enterprise. Entrepreneurship is now a dynamic and expanding area of research, teaching, and debate, but there has been no standard reference work which is suitable for both established scholars and new researchers. This book fills that gap. All the major aspects of entrepreneurship are covered, including: * the start-up and growth of firms, * financing and venture capital, * innovation, technology and marketing, * women entrepreneurs, * ethnic entrepreneurs, * migration, * small firm policy, * the economic and social history of entrepreneurship. This is a comprehensive review of state-of-the-art research in entrepreneurship, written by an international team of leading scholars, and will be an essential reference for academics and policy makers, as well as being suitable for use on masters courses and doctoral programs. About the Series Oxford Handbooks in Business & Management bring together the world's leading scholars on the subject to discuss current research and the latest thinking in a range of interrelated topics including Strategy, Organizational Behavior, Public Management, International Business, and many others. Containing completely new essays with extensive referencing to further reading and key ideas, the volumes, in hardback or paperback, serve as both a thorough introduction to a topic and a useful desk reference for scholars and advanced students alike.
Alessandro Torlonia-Daniela Felisini 2017-01-20 This book provides a vivid biography of a towering Italian banker, pioneer and entrepreneur. It weaves the entrepreneurial ventures of Alessandro Torlonia (1800-1886) through the narratives of business and politics in the Nineteenth century, the growth of European financial markets and the decline of Papal power during the Italian Risorgimento. The discussion is founded in rigorous historical research using original sources such as the Archivum Secretum Vaticanum papers and other official documents; the archives of the Torlonia family, and of the Rothschild bank in Paris; memoirs; correspondences, and newspapers. Through this book readers learn that Alessandro Torlonia was a man of many faces, who was one of the most complex and influential characters of Italian economic life in the nineteenth century. Felisini also provides an expert critique of the financial history of the papacy: an area of heightened interest given the notoriety of relations between the Holy See and its bankers in the twentieth and twenty-first centuries. Focal topics such as the history of European elites and the history of European financial markets will have an interdisciplinary appeal for scholars and researchers.
