Contested Tongues-Laada Bilaniuk 2005 During the controversial 2004 elections that led to the "Orange Revolution" in Ukraine, cultural and linguistic differences threatened to break apart the country. Contested Tongues explains the complex linguistic and cultural politics in a bilingual country where the two main languages are closely related but their statuses are hotly contested. Bilaniuk finds that the social divisions in Ukraine are historically rooted, ideologically constructed, and inseparable from linguistic practice. She does not take the labeled categories as givens but questions what "Ukrainian" and "Russian" mean to different people, and how the boundaries between these categories may be blurred in unstable times. Bilaniuk's analysis of the contemporary situation is based on ethnographic research in Ukraine and grounded in historical research essential to understanding developments since the fall of the Soviet Union. "Mixed language" practices (surzhyk) in Ukraine have generally been either ignored or reviled, but Bilaniuk traces their history, their social implications, and their accompanying ideologies. Through a focus on mixed language and purism, the author examines the power dynamics of linguistic and cultural correction, through which people seek either to confer or to deny others social legitimacy. The author's examination of the rapid transformation of symbolic values in Ukraine challenges theories of language and social power that have as a rule been based on the experience of relatively stable societies.

Choosing a Mother Tongue-Corinne A. Seals 2019-10-31 This book presents a sociocultural linguistic analysis of discourses of conflict, as well as an examination of how linguistic identity is embodied, negotiated and realized during a time of war. It provides new insights regarding multilingualism among Ukrainians in Ukraine and in the diaspora of New Zealand, the US and Canada, and sheds light on the impact of the Russian-Ukrainian war on language attitudes among Ukrainians around the world. Crucially, it features an analysis of a new movement in Ukraine that developed during the course of the war – ‘changing your mother tongue’, which embodies what it is to renegotiate linguistic identity. It will be of value to researchers, faculty, and students in the areas of linguistics, Slavic studies, history, politics, anthropology, sociology and international affairs, as well as those interested in Ukrainian affairs more generally.

Eurovisions: Identity and the International Politics of the Eurovision Song Contest since 1956-Julie Kalman 2019-11-19 This book uses the Eurovision Song Contest (ESC), as an analytical entry point to understand and illuminate post-War Europe and the drive to create an identity that can legitimise the European project in its broadest sense. The ESC presents an idealised vision of Europe, and this has long existed in a strained relationship with reality. While the trajectory of post-war European integration is a high-profile topic, we believe that the ESC offers a unique and innovative way to think about the role of culture in the history of post-War European integration and tensions between the ideal and reality of European unity. Through the series of case studies that make up the chapters in this book, analysis brings these interlinked tensions to light, exploring the roles of culture and identity, alongside and a productive conversation with the political and economic projects of post-war European integration.

Breaking the Tongue-Matthew Pauly 2014-11-21 In the 1920s and early 1930s, the Communist Party embraced a policy to promote national consciousness among the Soviet Union’s many national minorities as a means of Sovietizing them. In Ukraine, Ukrainian-language schooling, coupled with pedagogical innovation, was expected to serve as the lynchpin of this social transformation for the republic’s children. The first detailed archival study of the local implications of Soviet nationalities policy, Breaking the Tongue examines the implementation of the Ukrainization of schools and
children’s organizations. Matthew D. Pauly demonstrates that Ukrainization faltered because of local resistance, a lack of resources, and Communist Party anxieties about nationalism and a weakening of Soviet power – a process that culminated in mass arrests, repression, and a fundamental adjustment in policy.

Shallow Equality and Symbolic Jurisprudence in Multilingual Legal Orders-Janny H.C. Leung 2019-01-28 What challenges face jurisdictions that attempt to conduct law in two or more languages? How does choosing a legal language affect the way in which justice is delivered? Answers to these questions are vital for the 75 officially bilingual and multilingual states of the world, as well as for other states contemplating a move towards multilingualism. Arguably such questions have implications for all countries in a world characterized by the pressures of globalization, economic integration, population mobility, decolonization, and linguistic re-colonization. For lawyers, addressing such challenges is made essential by the increased frequency and scale of transnational legal dealings and proceedings, as well as by the lengthening reach of international law. But it is not only policy makers, legislators, and other legal practitioners who must think about such questions. The relationship between societal multilingualism and law also raises questions for the burgeoning field of language and law, which posits--among other tenets--the centrality of language in legal processes. In this book, Janny H.C. Leung examines key aspects of legal multilingualism. Drawing extensively on case studies, she describes the implications of the legal, practical, and ideological dilemmas encountered in a given country when it becomes bilingual or multilingual, discussing such issues as: how legal certainty and the linguistic ideology of authenticity may be challenged in a multilingual jurisdiction; how courts balance the language preferences of different courtroom participants; and what historical, socio-political and economic factors may influence the decision to cement a given language as a jurisdiction's official language. Throughout, Leung elaborates a theory of "symbolic jurisprudence" to explore common dilemmas found across countries, despite their varied political and cultural settings, and argues that linguistic equality as proclaimed and practiced today is a shallow kind of equality. Although officially multilingual jurisdictions appear to be more inclusive than their monolingual counterparts, they run the risk of disguising substantive inequalities and displacing real efforts for more progressive social change. This is the first book to offer overarching discussion of how such issues relate to each other, and the first systematic study of legal multilingualism as a global phenomenon.

Russian Language Outside the Nation-Larissa Ryazanova-Clarke 2014-03-30 This book explores a comprehensive set of tensions which emerged from the dislocated and deterritorialised position of Russian in the contemporary world from a sociolinguistic perspective.

New Nation-States and National Minorities-Julian Bernauer 2014-03-03 The twentieth century saw the emergence of new states shaped on the classic nation-state model. How has this model been
moulded and implemented? What have been the implications for minorities in these new nation-states? And how have minorities responded to nationalising processes? Following a discussion by Rogers Brubaker of his concept of nationalising state, contributions to this volume examine the dynamic relations between national minorities and nation-states established in the course of the last century, including Ukraine, Moldova, Turkey, Malaysia and Israel. This book’s original theoretical framework and comparative approach offer a new understanding of the complex interactions between the formulation of a state identity and the aspirations of those who do not fit in the proclaimed core nation. In light of recent developments in – notably – Ukraine and Israel, this book is essential reading for all those interested in the rights and protection of national minorities and, more broadly, in the debates over the definition of the polity in a tense environment.

New Drama in Russian-J.A.E. Curtis 2020-05-14 How and why does the stage, and those who perform upon it, play such a significant role in the social makeup of modern Russia, Ukraine and Belarus? In New Drama in Russian, Julie Curtis brings together an international team of leading scholars and practitioners to tackle this complex question. New Drama, which draws heavily on techniques of documentary and verbatim writing, is a key means of protest in the Russian-speaking world; since the fall of the Soviet Union in 1991, theatres, dramatists, and critics have collaborated in using the genre as a lens through which to explore a wide range of topics from human rights and state oppression to sexuality and racism. Yet surprisingly little has been written on this important theatrical movement. New Drama in Russian rectifies this. Through providing analytical surveys of this outspoken transnational genre alongside case-studies of plays and interviews with playwrights, this volume sheds much-needed light on the key issues of performance, politics, and protest in Russia, Ukraine and Belarus. Meticulously researched and elegantly argued, this book will be of immense value to scholars of Russian cultural history and post-Soviet literary studies.

Nationalism, Ethnicity and Boundaries-Jennifer Jackson 2014-11-13 Nationalism and ethnicity have become, across time and space, a force in the construction of boundaries. This book analyses geographical and physical borders and symbolic, political and socio-economic boundaries, and how they impact upon nationalism and ethnic identity. Geographic and other tangible borders are critical components in the making and unmaking of boundaries. However, symbolic or intangible boundaries along national, ethnic, political or socio-economic criteria are equally significant. Organised into three sections on theory, national and transnational case studies, this book both introduces existing approaches to the study of boundaries and illustrates how it is possible to apply renewed boundary approaches to better understand nationalism and ethnicity in contemporary contexts. Expert contributors in the field present detailed case studies on the UK, Israel, Estonia, Latvia, Ukraine and Kazakhstan, and draw upon further examples from more than a dozen countries to provide a critical evaluation of the use of borders, boundaries and boundary-making in the study of nationalism and ethnicity. This book will be of interest to students and scholars of International Politics, Nationalism, Racial and Ethnic Politics, Ethnic Identity and Sociology.

Aspects of the Orange Revolution III-Ingmar Bredies 2007-11-22 The third volume of "Aspects of the Orange Revolution" complements the essays of the first two collections providing further historical background on, and analytical insight into, the events at Kyiv in late 2004. Its seven contributions by both established and younger specialists range from electoral statistics to musicology, and deal with, among other issues, such questions as: Why had blatant election fraud not generated mass protest
before 2004, but, in that year, did? How was Viktor Yushchenko able to collect enough votes to defeat the establishment candidate Viktor Yanukovych, and become the new President of a socially, geographically and culturally divided country? How was it possible to prevent large-scale violence, and which role did the judiciary play during the quasi-revolutionary events in autumn-winter 2004? What legal foundations and court decisions made the repetition of the second round of the presidential elections possible? Which campaign instruments, and political ‘technologies’ were applied by various domestic and foreign actors to activate the Ukrainian population? How did the internet and music become factors in the emergence of mass protests involving hundreds of thousands of people? To which degree and how did external influences affect the Orange Revolution? Erik S. Herron, Paul E. Johnson, Dominique Arel, Ivan Katchanovski, Ralph S. Clem, Peter R. Craumer, Hartmut Rank, Stephan Heidenhain, Adriana Helbig, and Andrew Wilson present a multifarious panorama of the origins and dynamics of the processes that changed the nature of political and civic life during and between the three rounds of Ukraine’s fateful 2004 presidential elections.

Language of Conflict-Natalia Knoblock 2020-06-11 Exploring the ways in which language and conflict are intertwined and interrelated, this volume examines the patterns of public discourse in Ukraine and Russia since the beginning of the Ukrainian Crisis in 2014. It investigates the trends in language aggression, evaluation, persuasion and other elements of conflict communication related to the situation. Through the analysis of the linguistic features of salient discourses and prevalent narratives constructed by different social groups, Language of Conflict reflects competing worldviews of various stakeholders in this conflict and presents multiple, often contradictory, visions of the circumstances. Contributors from Ukraine, Russia and beyond investigate discursive representations of the most important aspects of the crisis: its causes and goals, participants and the values and ideologies of the opposing factions. They focus on categorization, stance, framing, (de)legitimation, manipulation and coping strategies while analysing the ways in which the stress produced by social discord, economic hardship, and violence shapes public discourse. Primarily focusing on informal communication and material gathered from online sources, the collection provides insight into the ways people directly affected by the crisis think about and respond to it. The volume acknowledges the communicators’ active role in constructing the (often incompatible) discursive images of the conflict and concentrates on the conscious and strategic use of linguistic resources in negative and aggressive communication.

Post-Ottoman Coexistence-Rebecca Bryant 2016-03-01 In Southeast Europe, the Balkans, and Middle East, scholars often refer to the “peaceful coexistence” of various religious and ethnic groups under the Ottoman Empire before ethnonationalist conflicts dissolved that shared space and created legacies of division. Post-Ottoman Coexistence interrogates ways of living together and asks what practices enabled centuries of cooperation and sharing, as well as how and when such sharing was disrupted. Contributors discuss both historical and contemporary practices of coexistence within the context of ethno-national conflict and its aftermath.

Near Abroad - Gerard Toal 2016-12-16 Before Russia invaded Ukraine, it invaded Georgia. Both states are part of Russia's "near abroad" - newly independent states that were once part of the Soviet Union and are now Russia's neighbors. While the Russia-Georgia war of 2008 faded from the headlines in the wake of the global recession, the geopolitical contest that created it did not. Six years later, the spectre of a revanchist Russia returned when Putin's forces invaded and annexed the Crimean peninsula, once part of Russia but an internationally recognized part of Ukraine since the Soviet collapse. Crimea's annexation and follow on conflict in eastern Ukraine have generated the greatest geopolitical crisis on the European continent since the end of the Cold War. In Near Abroad, the eminent political geographer Gerard Toal moves beyond the polemical rhetoric that surrounds Russia's interventions in Georgia and Ukraine to study the underlying territorial conflicts and geopolitical struggles. Central to understanding are legacies of the Soviet Union collapse: unresolved territorial issues, weak states and a conflicted geopolitical culture in Russia over the new territorial order. The West's desire to expand NATO contributed to a growing geopolitical contest in Russia's near abroad. This found expression in a 2008 NATO proclamation that Georgia and Ukraine will become members of NATO, a "red line" issue for Russia. The road to invasion and war in Georgia and Ukraine, thereafter, is explained in Near Abroad. Geopolitics is often thought of as a game of chess. Near Abroad provides an account of real life geopolitics, one that emphasizes changing spatial relationships, geopolitical cultures and the power of media images. Rather than being a cold game of deliberation, geopolitics is often driven by emotions and ambitions, by desires for freedom and greatness, by clashing personalities and reckless acts. Not only a penetrating analysis of Russia's relationships with its regional neighbors, Near Abroad also offers an analysis of how US geopolitical culture frequently fails to fully understand Russia and the geopolitical archipelago of dependencies in its near abroad.

Linguistic Landscapes Beyond the Language Classroom - Greg Niedt 2020-12-10 Linguistic landscapes can play an important role in educating individuals beyond formal pedagogical environments. This book argues that anywhere can be a space for people to learn from displayed texts, images, and other communicated signs, and consequently a space where teachable cultural moments are created. Following language learning trajectories that 'exit through the language classroom' into city streets, public offices, museums and monuments, this volume presents
innovative work demonstrating that anyone can learn from the linguistic landscape that surrounds them. Offering a bridge between theoretical research and practical application, chapters consider how we make sense of places by understanding how the landscape is used to express, claim and contest identities and ideologies. In this way, Linguistic Landscapes Beyond the Language Classroom highlights the unexpected potential of the informal settings for learning and for teachers to expand their students' intercultural experience.

The Soft Power of the Russian Language-Arto Mustajoki 2019-06-12 Exploring Russian as a pluricentric language, this book provides a panoramic view of its use within and outside the nation and discusses the connections between language, politics, ideologies, and cultural contacts. Russian is widely used across the former Soviet republics and in the diaspora, but speakers outside Russia deviate from the metropolis in their use of the language and their attitudes towards it. Using country case studies from across the former Soviet Union and beyond, the contributors analyze the unifying role of the Russian language for developing transnational connections and show its value in the knowledge economy. They demonstrate that centrifugal developments of Russian and its pluricentricity are grounded in the language and education policies of their host countries, as well as the goals and functions of cultural institutions, such as schools, media, travel agencies, and others created by émigrés for their co-ethnics. This book also reveals the tensions between Russia’s attempts to homogenize the ‘Russian world’ and the divergence of regional versions of Russian reflecting cultural hybridity of the diaspora. Interdisciplinary in its approach, this book will prove useful to researchers of Russian and post-Soviet politics, Russian studies, Russian language and culture, linguistics, and immigration studies. Those studying multilingualism and heritage language teaching may also find it interesting.

The Palgrave Handbook of Slavic Languages, Identities and Borders-Tomasz Kamusella 2015-10-30 Languages are artefacts of culture, meaning they are created by people. They are often used for identity building and maintenance, but in Central and Eastern Europe they became the basis of nation building and national statehood maintenance. The recent split of the Serbo-Croatian language in the wake of the break-up of Yugoslavia amply illustrates the highly politicized role of languages in this region, which is also home to most of the world’s Slavic-speakers. This volume presents and analyzes the creation of languages across the Slavophone areas of the world and their deployment for political projects and identity building, mainly after 1989. The overview concludes with a reflection on the recent rise of Slavophone speech communities in Western Europe and Israel. The book brings together renowned international scholars who offer a variety of perspectives from a number of disciplines and sub-fields such as sociolinguistics, socio-political history and language policy, making this book of great interest to historians, sociologists, political scientists and anthropologists interested in Central and Eastern Europe and Slavic Studies.

Revivals, Nationalism, and Linguistic Discrimination-Kara Fleming 2019-12-13 Is linguistic revival beneficiary to the plight of newly emerging, peripheral or even ‘threatened’ cultures? Or is it a smokescreen that hides the vestiges of ethnocentric ideologies, which ultimately create a hegemonic relationship? This book takes a critical look at revival exercises of special historical and geopolitical significance, and argues that a critical and cautious approach to revival movements is necessary. The cases of Sinhala, Kazakh, Mongolian, Catalan, and even Hong Kong Cantonese show that it is not through linguistic revival, but rather through political representation and economic development, that the peoples in question achieve competitiveness and equality amongst their neighbors. On the other hand, linguistic revival in these and other contexts can, and has been, used to support nationalist or ethnocentric agendas, to the detriment of other groups, recreating the same dynamics that generated the argument for revival in the first place. This book argues that respect for linguistic and other diversity, multilingualism and multiculturalism, is not compatible with linguistic revival that mirrors nation-building and essentializing identity construction.

Comparing Post-Socialist Transformations-Maia Chankseliani 2018-11-05 This volume revisits the book edited by David Phillips and Michael Kaser in 1992, entitled Education and Economic Change in Eastern Europe and the Former Soviet Union (https://doi.org/10.15730/books.42). Two and a half decades later, this volume reflects on how post-socialist countries have engaged with what Phillips & Kaser called ‘the flush of educational freedom’. Spanning diverse geopolitical settings that range from Southeast and Central Europe to the Caucasus and Central Asia, the chapters in this volume offer analyses of education policies and practices that the countries in this region have pursued since the fall of the Berlin Wall and the dissolution of the Soviet Union. This book explores three interrelated questions. First, it seeks to capture complex reconfigurations of education purposes during post-socialist transformations, noting the emergence of neoliberal education imaginaries in post-socialist spaces and their effects on policy discussions about education quality and equity across the region. Second, it examines the ongoing tensions inherent in post-socialist transformations, suggesting that beneath the surface of dominant neoliberal narratives there are always powerful countercurrents – ranging from the persisting socialist legacies to other alternative conceptualizations of education futures – highlighting the diverse trajectories of post-socialist education transformations. And finally, the book engages with the question of ‘comparison’, prompting both the contributing authors and readers to reflect on how research on post-socialist education transformations can contribute to rethinking comparative methods in education across space and time.

Unequal Englishes-R. Tupas 2015-05-26 This book proposes, examines and unpacks the notion of unequal Englishes as a way to understand English today. Unlike many studies on the pluralization of English, the volume assumes that inequalities and Englishes are inextricably linked and must be understood and theorized together.

the divergence of worldviews among ex-Soviet people in Tatarstan, where a political movement for sovereignty (1986-2000) had significant social effects, most saliently, by increasing the domains where people speak the Tatar language and circulating ideas associated with Tatar culture. Also addresses the question of how Russian Muslims experience quotidian life in the post-Soviet period. The only book-length ethnography in English on Tatars, Russia’s second most populous nation, and also the largest Muslim community in the Federation, offers a major contribution to our understanding of how and why nations form and how and why they matter - and the limits of their influence, in the Tatar case.

The Languages and Linguistics of Europe-Bernd Kortmann 2011-07-27 Open publicationThe Languages and Linguistics of Europe: A Comprehensive Guide is part of the multi-volume reference work on the languages and linguistics of the continents of the world. The book supplies profiles of the language families of Europe, including the sign languages. It also discusses the areal typology, paying attention to the Standard Average European, Balkan, Baltic and Mediterranean convergence areas. Separate chapters deal with the old and new minority languages and with non-standard varieties. A major focus is language politics and policies, including discussions of the special status of English, the relation between language and the church, language and the school, and standardization. The history of European linguistics is another focus as is the history of multilingual European ‘empires’ and their dissolution. The volume is especially geared towards a graduate and advanced undergraduate readership. It has been designed such that it can be used, as a whole or in parts, as a textbook, the first of its kind, for graduate programmes with a focus on the linguistic (and linguistics) landscape of Europe.

Translanguaging in Higher Education-Catherine M. Mazak 2016-12-09 This book examines translanguaging in higher education and provides clear examples of what translanguaging looks like in practice in particular contexts around the world. While higher education has historically been seen as a monolingual space, the case studies from the international contexts included in this collection show us that institutions of higher education are often translingual spaces that reflect the multilingual environments in which they exist. Chapters demonstrate how the use of translanguaging practices within the context of global higher education, where English plays an increasingly important role, allows students and professors to build on their linguistic repertoires to more efficiently and effectively learn content. The documentation of such practices within the context of higher education will further legitimatize translanguaging practices and may lead to their increased use not only in higher education but also in both primary and secondary schools.

Contemporary Ukraine on the Cultural Map of Europe-Larissa M. Zaleska Onyshkevych 2014-12-18 The concept of a ‘return to Europe’ has been integral to the movement for Ukrainian national rebirth since the nineteenth century. While the goal of a more fully reformed politics remains elusive, numerous expressions of Ukrainian culture continue to develop in the European spirit. This wide-ranging book explores Ukraine’s European cultural connection, especially as it has been reestablished since the country achieved independence in 1991. The contributors discusses many aspects of Ukraine’s contemporary culture - history, politics, and religion in Part I; literary culture in Part II; and language, popular culture, and the arts in Part III. What emerges is a fascinating picture of a young country grappling with its divided past and its colonial heritage, yet asserting its voice and preferences amid the diverse and at times conflicting realities of the contemporary political scene. Europe becomes a powerful point of reference, a measure against which the situation in post-independence Ukraine is gouged and debated. This framework allows for a better understanding of the complexities deeply ingrained in the social fabric of Ukrainian society.

New Media in New Europe-Asia-Jeremy Morris 2016-04-14 This volume offers an in-depth investigation of the role of new media in the political, social and cultural life in the region of Europe-Asia. By focusing on new media, which is understood primarily as internet-enabled networked social practice, the book puts forward a political and cultural redefinition of the region which is determined by the recognition of the diversity of new media uses in the countries included in the study. This book focuses on the period prior to the advent of ‘world internet revolutions’, and it
registers the region at its pivotal moment—at the time of its entry into the post-broadcast era. Does the Internet aid democratisation or it conditioned by socio-political norms? Has the Internet changed politics or has it had to fit existing political structures? Has the use of digital technologies revolutionized election campaigns? How is hyperlinked society different from society prior to the advent of the web? How do ordinary people actually use the Internet. These and other pressing questions—crucial to understanding the post-socialist world—are investigated in the current volume. This book was published as a special issue of Europe-Asia Studies.

Eurasia 2.0-Mikhail Suslov 2016-03-17 This book discusses the return of geopolitical ideas and doctrines to the post-Soviet space with special focus on the new phenomenon of digital geopolitics, which is an overarching term for different political practices including dissemination of geopolitical ideas online, using the internet by political figures and diplomats for legitimation and outreach activity, and viral spread of geopolitical memes. Different chapters explore the new possibilities and threats associated with this digitalization of geopolitical knowledge and practice. Our authors consider new spatial sensibilities and new identities of global as well as local Selves, the emergence of which is facilitated by the internet. They explore recent reconfigurations of the traditional imperial conundrum of center versus periphery. Developing Manuel Castells’ argument that social activism in the digital era is organized around cultural values, the essays discuss new geopolitical ideologies which aim to reinforce Russia’s spiritual sovereignty as a unique civilization, while at the same time seeking to rebrand Russia as a greater soft power by utilizing the Russian-speaking diaspora or employing traditionalist rhetoric. Great Power imagery, enemy-making, and visual mappings of Russia’s future territorial expansion are traditional means for the manipulation of imperial pleasures and geopolitical fears. In the age of new media, however, this is being done with greater subtlety by mobilizing the grassroots, contracting private information channels, and depoliticizing geopolitics. Given the political events of recent years, it is logical that the Ukrainian crisis should provide the thematic backdrop for most of the authors.

Mapping Difference-Marian J. Rubchak 2011-04-01 Drawn from various disciplines and a broad spectrum of research interests, these essays reflect on the challenging issues confronting women in Ukraine today. The contributors are an interdisciplinary, transnational group of scholars from gender studies, feminist theory, history, anthropology, sociology, women’s studies, and literature. Among the issues they address are: the impact of migration, education, early socialization of gender roles, the role of the media in perpetuating and shaping negative stereotypes, the gendered nature of language, women and the media, literature by women, and local appropriation of gender and feminist theory. Each author offers a fresh and unique perspective on the current process of survival strategies and postcommunist identity reconstruction among Ukrainian women in their current climate of patriarchalism.

On the Border of Language and Dialect-Marjatta Palander 2018-04-12 This volume considers the linguistic borders between a language and a dialect as well as the administrative, cultural, and mental borders that affect the linguistic ones. The articles approach mental borders between dialects, dialect continua, and areas of mixed dialect, language ideologies, language mixing, and
contact-induced language change. Karelian receives particular attention, being examined from multiple perspectives with attention to variation, maintenance, and the dialect perceptions of its speakers. Together, the articles paint a picture of multidimensional, multilingual, variable, and ever-changing linguistic reality where diverse borders, boundaries, and barriers meet, intertwine, and cross each other. The combination of the articles also aims to cross disciplinary and methodological borders and present new perspectives on earlier studies.

Translinguistics-Jerry Won Lee 2019-12-06 Translinguistics represents a powerful alternative to conventional paradigms of language such as bilingualism and code-switching, which assume the compartmentalization of different 'languages' into fixed and arbitrary boundaries. Translinguistics more accurately reflects the fluid use of linguistic and semiotic resources in diverse communities. This ground-breaking volume showcases work from leading as well as emerging scholars in sociolinguistics and other language-oriented disciplines and collectively explores and aims to reconcile the distinction between 'innovation' and 'ordinariness' in translinguistics. Features of this book include: 18 chapters from 28 scholars, representing a range of academic disciplines and institutions from 11 countries around the world; research on understudied communities and geographic contexts, including those of Latin America, South Asia, and Central Asia; several chapters devoted to the diversity of communication in digital contexts. Edited by two of the most innovative scholars in the field, Translinguistics: Negotiating Innovation and Ordinariness is essential reading for scholars and students interested in the question of multilingualism across a variety of subject areas.

Applying Language Science to Language Pedagogy-Montserrat Sanz 2011-12-08 This book establishes a bridge between current research in Linguistics and Psycholinguistics and language pedagogy in the classroom. It reformulates the debates about teaching approaches by calling the reader's attention to discoveries about the structure of grammar, the universals of language, mind processes while comprehending, producing and storing language, and facts about learning. The popularization of L2 teaching brought with it a need to find efficient teaching methods. Debates have hinged mainly around the alleged advantages of communicative vs. traditional methods. However, most approaches have their roots in linguistic and psychological theories that have been questioned by language researchers. Some language teachers are probably unaware of these advances and to that extent, continue to adhere to teaching approaches mainly based on intuitions. Consequently, evaluating materials may be often performed in rather uninformed circumstances. The book contains chapters on relevant issues by leading researchers, classified into three main areas. The editors contribute a chapter to each of these sections about the implications for second language teaching. This book facilitates an approximation between researchers in the theoretical and experimental fields of language and those responsible for innovation in language teaching. It is designed so that L2 teachers can adopt and adjust the knowledge drawn from the book to their particular environment and group of students.
